

About GAC Business Solutions

GAC Business Solutions has been providing software consultancy to companies and entrepreneurs since 1983. Our clientele ranges from small businesses (10+ users) to large enterprises (500+ users). Our 140 ambitious employees support over 400 customers whom we consider business partners. We operate using the 'Growing Together' business philosophy that utilizes teamwork to achieve comprehensive growth. Our growth formula explains how we realize this goal: Our Customer (you) x GAC x Microsoft equals growth.

In 1997 we successfully transitioned to a Navision Solution Centre. Navision has later been renamed to Microsoft Dynamics NAV. It is the most comprehensive ERP solution in the Microsoft Business Solutions product line. GAC is one of the biggest Microsoft Business Partners in The Netherlands and the biggest Microsoft Dynamics NAV partner. Microsoft has always been a strong believer in vertical solutions. GAC distinguishes 3 broad verticals for which it has developed specialized solutions:

- Manufacturing / Wholesale
- Professional Services Automation (ICT-business/ Accountancy / (Child)Care)
- Special Projects

Software Infrastructure is key to success for modern businesses. GAC has proven to be a loyal business partner. We believe business software is bigger than ERP and facilitate a full range of modern Business Solutions: Dynamics NAV, Dynamics CRM, Office 365, Power BI, SharePoint, intranet, extranet, document management and projects & services automation. All our solutions are based on the world's strongest, most innovative and proven business platform: Microsoft.

Facts and Figures

Sharing Knowledge

GAC has helped over 400 companies meet their needs for further growth. Our business values are: honesty, respect and sharing knowledge with customers, colleagues and business partners. We expand and update our software solutions to ensure our business partners needs continue to be met as they change over time. With GAC as your business partner you ensure access to a truly dynamic business solution.

Growth Formula

Our collective success is based on our formula for growth, called the 'groeiformule' in Dutch. Customer (you) x GAC x Microsoft = Growth. It shows how growth is achieved by multiplying the strengths of you, GAC and Microsoft through cooperation. Our installed base of over 400 satisfied customers shows the success of this approach. Growing together works.

Pipol (Shareholdership)

Creating value through committed partnership

International projects and global clients can count on GAC Business Solutions as we are the Dutch partner and co-owner of Pipol. We work for international customers through our dedicated business unit: GAC Global Solutions (GGS).

Solutions provided by GAC Global Solutions are scalable and suitable for international or global roll out. We offer in depth knowledge of our target industries and the local business climate. Through Pipol we offer centrally coordinated projects that serve the needs of international headquarters and subsidiaries. All solutions are designed to adhere to local requirements as well as corporate standards.

Pipol is a global provider of Microsoft Dynamics solutions and services. It specializes in value creation for international organizations. Working with Pipol allows global organizations to tap into the knowledge and experience of leading Microsoft Certified professionals working locally in more than 50 countries.

With a unique international focus, exclusive committed partnership model, and flexible way of working, GAC delivers solutions and services that enable international organizations to increase control, improve efficiency, and boost collaboration across multiple sites and cultures before, during and after international projects.
